Klik 7 Lighting Connection

Marshalling Boxes

Pre-wired plugs with sockets

Pre-wired plugs

Pre-wired plugs for dimmable luminaires

Pre-wired plugs for dimmable luminaires with emergency

Pre-wired marshalling box link leads

ceiling roses

Wireable/ rewireable plug

Occupancy sensors

Hyper frequency detector

Corridor motion detector

Developed to specifically address the latest lighting technologies, Klik 7 has evolved as an essential element of controllable lighting solutions.

Safe on-load connection

Luminaires can be connected in seconds in absolute safety, without circuit isolation as all live contacts are inaccessible and the earth connection is made before any other, facilitating a simplified maintenance plan.

Occupancy Sensing

Our range of occupancy sensors can provide presence and absence control of lighting, providing energy savings by switching lights on or off depending on the usage of the room.

More Control

Klik 7 offers all the same connection benefits as Klik 4 with additional control features.

Easier

Klik 7 facilitates a truly scalable approach to lighting control, without compromising speed, security or flexibility of installation.

Dimming

Klik allows for automatic lighting control which can provide energy savings by not operating when sufficient light levels exist. Klik 7 also offers automatic dimming through daylight link or manual dimming via a wall switch.
